Code_GPT

write a code to get current date and time

🖥️ code_writer_agent: ``` import datetime

current_datetime = datetime.datetime.now()

print(current_datetime)

    This will print the current date and time in the format "YYYY-MM-DD hh:mm:ss". You can modify the format by us

import datetime

current_datetime = datetime.datetime.now() print(current_datetime.strftime("%Y-%m-%d"))

    This will print the current date in the format "YYYY-MM-DD". You can modify the format to get different informa

🖥️ code_executor_agent_docker: exitcode: 0 (execution succeeded) Code output: 2024-04-20 11:25:48.129442 2024-04-20

🖥️ code_debugging_agent: TERMINATE
